DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 5-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Whitted et al. (US 6,795,137).**

4. Regarding claims 5 and 12, Whitted discloses an arrangement (see figure 12, for instance), comprising: a panel (500) pertaining to a flat screen, wherein the panel can be illuminated from the rear by the light of a back light (510); a back light control (503, 504) for adjusting a luminance detected by a sensor (502) to a pre-definable actual value, wherein first light permeable parts (206) are arranged between the back light and the sensor, and wherein deterioration properties and/or temperature properties of the first light permeable parts essentially correspond to the properties of second light-permeable parts of the panel. Claims 5 and 12 are therefore unpatentable.

5. Regarding claims 6 and 13, Whitted discloses the arrangement according to claims 5 and 12 (see figure 12, for instance), wherein the first light-permeable parts comprise diffuser films and/or polarization films (column 1, lines 35-37). Claims 6 and 13 are therefore unpatentable.
6. Regarding claims 7 and 14, Whitted discloses the arrangement according to claims 6 and 13 (see figure 12, for instance), wherein the first light-permeable parts further comprise a panel glass with LCD fluid (104). Claims 7 and 14 are therefore unpatentable.
7. Regarding claims 8-11 and 15, Whitted discloses the arrangement according to claims 5-7 and 12 (see figure 12, for instance), wherein the first light-permeable parts are essentially identical to the second light-permeable parts. Claims 8-11 and 15 are therefore unpatentable.
